The industry's fastest high-volume blower

When production counts, the SERIES 1400 is in a class by itself. Meyer's top of the line SERIES 1400 is an all-fiber, large capacity machine that delivers unmatched open blow production and unparalleled accuracy.

If you want to do more jobs per day, or if you just want to complete big jobs faster, the Series 1400 has what it takes. The Series 1400 integrates an oversized hopper, the industry's largest available blower and a large 4" diameter line size, making it the perfect solution to your high production needs.

The Series 1400 is smartly engineered to simplify operation, minimize downtime and deliver accurate and uniform coverage. Meyer's exclusive quick-change seal strip system lets you replace seal strips in the feeder in a matter of minutes. A 4-speed transmission provides flexible hopper speed control, and the electrically operated material slide gate is panel mounted for easy adjustment. All gauges and controls are easily accessible without having to remove protective safety guards.

A complete range of drive options includes truck driven, mechanical power-take-off, and water cooled gas or diesel engines, so you can configure your Series 1400 to suit your specific needs and preferences.

The Series 1400 represents Meyer's total commitment to the highest standards of quality, craftsmanship and customer service. Backed by the most comprehensive 2-year warranty in the industry, the Series 1400 will serve the professional applicator for years.

Meyer SERIES 1400 Features

Live Bottom™ Processing Hopper
- Large 5 bag holding capacity
- Maintenance free agitator arm/pad assembly
- Fold-down loading shelf
- 4-speed feed control gearbox

High Speed Material Conditioner
- Electrically actuated metering gate
- Opposed shredder combs
- Easy access front inspection door
- Unique quick change shredder tines

Precision Machined Rotary Airlock Feeder
- Fully sealed vane tips/ends and shaft
- Heavy gauge steel construction
- Chrome plated interior surfaces
- Lubricated-for-life bearings with shaft seals
- Flanged 4" diameter inlet and outlet connections
- Easy access front seal change-out door

Positive Displacement Blower and Controls
- Panel mounted air volume valve
- Weight loaded pressure relief valve
- Automatic back pressure check valve
- Air inlet protector screen

Severe Service Drive Train
- Heavy duty chains and sprockets
- Large diameter, high grade shafting
- Large regreaseable sealed bearings
- High grade V-section drive belts
- Self adjusting belt tensioners

Controls and Instrumentation
- Tachometer, hour meter, voltmeter and system pressure
- Low oil auto shut-off
- Keyed ignition switch
- High temperature auto shut-off
- Metering gate actuator switch
- Idle/Run remote switch
- 200', 3-way remote control cord

Optional Features
- Radio remote control
- High pressure water pump
- Inlet air extension kit
- Exhaust pipe heat cowling
- Air inlet filter silencer

Safety Features
- Fully guarded drive/power train
- Panel mounted remote control lockout switch
- Panel mounted remote lockout indicator lamp
- Shear pin torque protection

Lease Packages Available.
